### BRT Construction Project:

#### New Canada Road – Between Colin Drive and Orlando Road

#### Reconstruction of New Canada Road

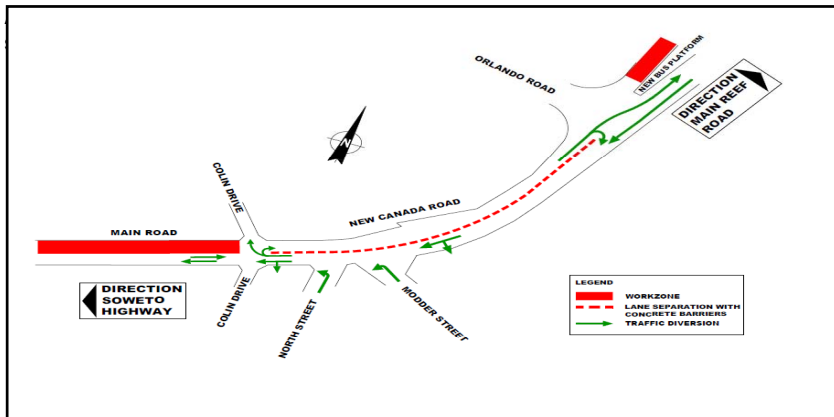

Johannesburg Development Agency (JDA) hereby informs affected road users of the construction activities planned on New Canada Road, between Colin Drive and Orlando Road on the BRT Section-2 project. There will from now and henceforth be no right turns possible into and from Modder Road and North Street, when coming from Soweto direction or from Noordgesig- town bound. Barriers will be placed in the centre of New Canada Road to prevent this, whilst construction activity is underway. Subsequently lane demarcation rumble blocks will replace these for dedicated BRT use.

Road users are urged to use alternate routes out of Noordgesig (mainly Colin drive) and efforts will be made to clearly define the deviation route. Motorists are further urged to abide by the temporary speed limit to be implemented in the area for the duration of the construction.

The JDA would like to apologise for the inconvenience experienced during this implementation of BRT infrastructure.

Phase : Construction on New Canada Road between Colin Drive and Orlando Road.

Anticipated Duration: Commencing mid February 2012 till end March 2012

Queries can be raised with project Community Liaison Officer. Details available through designated site supervisor or Rudzani 073-191-8943 at RSG Engineering.
